We understand that the rapidly growing population of women veterans face a range of complex challenges. Recent military engagements in Iraq and Afghanistan have seen more women than ever before in active service, and many return home to face additional challenges in acclimating to civilian life.

**We’re here to help.**
The Thresholds Women Veterans Health Initiative offers unique services catered to the needs of women veterans. These services include peer-to-peer support from fellow women veterans, housing placement, employment and education services, and much more.

**About Thresholds.**
Thresholds provides healthcare, housing, and hope for thousands of persons with mental illness in Illinois each year. Through care, employment, advocacy, and housing, Thresholds assists and inspires people with mental illness to reclaim their lives.
